ALTA Z. MARTIN
1116 th 180 St.
Ionia, IA 50645

Customer ID: **8358**
Certificate: **42-A-0755**
Site: 002
Alta Z Martin

Type: NEW SITE INSPECTION
Date: 18-AUG-2022

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The applicant uses a liquid medication dispensed by her veterinarian to deworm puppies. The label on the bottle was not legible, but the applicant says the medication is "Marquis" (Ponazuril). The medication did have a legible sticker stating it was to be stored in the refrigerator, but it was not cold or refrigerated at the time of inspection. The Program of Veterinary Care (PVC) says puppies should be dewormed with Marquis at 2, 4, 6, and 8 weeks of age. Cage cards for 4 litters, born between July 5th and July 30th, representing 9 puppies in all, were dewormed starting between 4 days to 1 week of age, and then repeated at 1 to 2 week intervals. No dosage for the Marquis is given on the PVC and the dosage on the bottle is not legible.

In order to ensure effective and safe dosing of medications, written instructions from the attending veterinarian must be followed and medications must be clearly labeled and properly stored. Each dealer shall establish and maintain programs of adequate veterinary care that include appropriate methods to prevent, control, diagnose, and treat disease. These programs and methods must be established with the guidance and approval of the attending veterinarian, clearly describing medications with dosages and frequencies to be used, and any deviation from or changes to the program must be approved by the attending veterinarian before they can be implemented.

Inspection Report

This inspection was a site approval inspection.

This site is not ready for approval to conduct activity covered under your current Animal Welfare Act License.

Conducting regulated activities at a non-approved site is a violation of the Animal Welfare Act.

Please contact your inspector to schedule your next new site approval inspection.

This inspection and exit interview were conducted with the licensee.
