#### 2.40(b)(2)

#### Repeat

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The licensee stores vaccines in a refrigerator that is not cold enough. The inspector placed the kestrel thermometer in the refrigerator for over 1 hour for an accurate temperature, the Kestrel read 46.7 degrees Fahrenheit. NeoVac DA2 and Neopar vaccines state they must be stored at 35-45 degrees Fahrenheit. Vaccines and medications not stored at the appropriate temperature as listed on the label may not protect the dogs from the diseases and illnesses the vaccines and medications are used for.

Each dealer shall use appropriate methods to prevent, control, diagnose, and treat diseases and injuries. The licensee must ensure all vaccines and medications are stored at the appropriate temperature that is listed on the products label.

This inspection was a site approval inspection.

This site is not ready for approval to conduct activity covered under your current Animal Welfare Act License.

Conducting regulated activities at a non-approved site is a violation of the Animal Welfare Act.

Please contact your inspector to schedule your next new site approval inspection.
