## 3.13(a)(3)

## Veterinary care for dogs.

The current program of veterinary care does not include a sampling program with a schedule approved by the attending veterinarian for intestinal worms, coccidia, and giardia. Lack of a sampling program makes it difficult to determine the effectiveness of the treatment plan for parasites. A sampling program for worms, coccidia, and giardia with a scheduled approved by the attending veterinarian must be established to help maintain an effective parasite program.

This is a 1st re-license inspection for a Class A license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or within 60 days from today or the applicant will forfeit the license fee and must wait 6 months to reapply. A 2nd re-license inspection was schedule with applicant at time of this inspection.

Regulated activity can continue under your existing USDA license until it expires.
