## Animal Welfare Inspection Form

### **Footnote 1**

**Notes:**

The overall construction of the facility is in good repair.

### **Footnote 2**

**Notes:**

Facility does have a small working ventilation fan. The ventilation fan is not enough to help with the strong odor of animal waste.

### **Footnote 3**

**Notes:**

I observed two mouse traps in use. Rodent feces build up in storage room of facility.

Discussed with owner about drainage system. Owner says systems work.

### **Footnote 4**

**Notes:**

Owner is going to grind screw points, fix jagged trim and broken barriers by 1.12.22.

### **Footnote 5**

**Notes:**

Latching system is broken and allows bottom of primary enclosure door to be pushed open. Could cause entrapment hazard.

Owner will address latch issue by 1.12.22.

### **Footnote 6**

**Notes:**

The entire facility was cluttered. The floors are covered in a grime type film. The storage room was cluttered, and sink was dirty.

Owner states will do major cleaning in next two weeks in store room and to floors of the facility. 1.25.22

### **Footnote 7**

**Notes:**

30 inches in wide 4 feet long. Dog do not get out to exercise in the winter.

### **Footnote 8**

**Notes:**

compliant with USDA guidelines.

### **Footnote 9**

**Notes:**

USDA ordered 3 yorkies and 1 maltes to be seen by a vet in september. Animals did see a vet 9/25/21

## Animal Welfare Inspection Form

### **Footnote 10**

**Notes:**

Dr. Couchman centerville

### **Footnote 11**

**Notes:**

USDA records of diposition. sold 3 puppies in 2021.

All older dogs are gave to the shelter in Ottumwa, IA when their breeding is over. The last dog euthanized on the property was 9.12.15.

## Animal Welfare Inspection Form

### **Footnote 1**

**Notes:**

Strong odor of animal waste. Strong odor of ammonia. Talked with owner about cleaning standing water and unsealed concrete floor holding bacteria. Owner plans on sealing the floors this spring 2022.

### **Footnote 2**

**Notes:**

Cement floors in housing facility are not sealed per Sommers. Sommers is going to seal the floor when it warms up this spring 2022.

### **Footnote 3**

**Notes:**

Drainage system under all the kennels contains animal waste and stagnant water. System is not draining. Discussed with owner about adding more slope and using more water when cleaning. Sommers says he plans to add more slope to the drains in spring 2022.

### **Footnote 4**

**Notes:**

Primary enclosures still contain sharp screw points. Two primary enclosures contain resting surfaces that are wood and not sealed or impervious to moisture. One primary enclosure on the upper row and east wall still has broke material partially holding the divider up. The broken divider could cause an entrapment hazard. Will be fixed by 2/14/22.

### **Footnote 5**

**Notes:**

Strong odor of animal waste. Strong odor of ammonia. Talked with owner about cleaning standing water and unsealed concrete floor holding bacteria. Owner plans on sealing the floors this spring 2022.

### **Footnote 6**

**Notes:**

Housing facility was cleaned before inspection. The floor looked muddy. The floor was not properly cleaned or disinfected. Owner says he cleans the primary enclosures daily and facility weekly. Will do more cleaning starting today 1/31/22.

## Animal Welfare Inspection Form

### **Footnote 1**

**Notes:**

Odor was much better than prior inspection on 1/31/22. Odor is coming from stagnant water and animal waste in drainage system.

### **Footnote 2**

**Notes:**

Cement floors in housing facility are not sealed per Sommers. Sommers is going to seal the floor when it warms up this spring 2022. Floors are much cleaner than prior inspection on 1/31/22.

### **Footnote 3**

**Notes:**

Drainage system under all the kennels contains animal waste and stagnant water. System is not draining. Discussed with owner about adding more slope and using more water when cleaning. Sommers says he plans to add more slope to the drains in spring 2022. The drainage system seems to be the main source of odor at this point in time. Discussed with owner about flushing system with fresh water more often.

### **Footnote 4**

**Notes:**

L-shaped brackets holding up panels between kennels are still broken. Discussed with owner about fixing broken brackets. Fixing the L's will sure up panels between kennels that have began to sag. If a dog were to push on the panel it could cause the panel to separate from the wall causing an entrapment hazard.

### **Footnote 5**

**Notes:**

Facility is much cleaner but still needs cleaned. Floor is dirty. Drainage system has water, food, and feces sitting in it.

## Animal Welfare Inspection Form

### **Footnote 1**

**Notes:**

Facility has a strong odor of animal waste. Odor has not gotten any better since the cement floor has been sealed. Went over possible options to address the strong odor such as bathing the animals and doing more frequent cleaning. Showed owner specific areas the had waste buildup under kennels that could be harboring odors.

### **Footnote 2**

**Notes:**

Cement floors have been sealed with a clear sealing product and are impervious to moisture.

### **Footnote 3**

**Notes:**

Waste Disposal:

Dog feces had not been removed from a primary enclosure. Owner stated it could have been in the primary enclosure for weeks. The primary enclosure is on the top row east wall and is currently vacant. There were puppies in the enclose during the previous inspection. The feces present is from an adult dog.

Housing Facilities/ drainage:

Green calcified build up in the drainage system that runs under all primary. Took a scrapper and scrapped away the green build up inside the drainage system to show the owner that the system was not being properly cleaned and that it was debris build up and not a stain.

### **Footnote 4**

**Notes:**

Dog feces had not been removed from a primary enclosure. Owner stated it could have been in the primary enclosure for weeks. The primary enclosure is on the top row east wall and is currently vacant. There were puppies in the enclose during the previous inspection on 2.16.22 . The feces present is from an adult dog.

Cobwebs in all primary enclosures near the tops. Hair build up on the bottom of all primary enclosures. Waste build up under primary enclosure.

I went over more frequent and detailed cleaning with the owner. I explained to the owner if things such as cobwebs are present, he is not doing good enough job cleaning. I pointed out hair and feces under all primary enclosure. I also showed the owner other debris (an orange sticky buildup) on primary enclosure that suggested they are not cleaned properly.

### **Footnote 5**

**Notes:**

No animals moved since initial inspection.

## Animal Welfare Inspection Form

### **Footnote 1**

**Notes:**

Wire on top outdoor run is a risk for injury. Structure must be in good repair to prevent injury to the dogs. This needs to be fixed by 8/12/22

### **Footnote 2**

**Notes:**

There is still present mouse droppings. There must be an effective vermin control in place. This needs to improve by 8/12/22, owner does have mouse traps in place.

### **Footnote 3**

**Notes:**

Resting surface is not of adequate size. Resting surfaces need to be of adequate size for the dog to lay on. Resting surfaces need to be bigger by 8/12/22

### **Footnote 4**

**Notes:**

One dog on the middle right was looking outside of kennel with the door open. All primary enclosure must have secure latches to prevent injury. This latch needs to be replaced by 8/12/22.

### **Footnote 5**

**Notes:**

Outdoor run needs to be cleaned in the upper right area. Facilities need to be maintained and cleaned a minimum of 1 every 24hours or more so as needed. This needs to be done by 8/12/22 or a not in use needs to be placed on that particular kennel.

Walls that separate kennels need cleaned. Facilities need to be maintained and cleaned a minimum of 1 every 24hours or more so as needed. This needs to be done by 8/12/22

Whelping boxes need to be cleaned. Facilities need to be maintained and cleaned a minimum of 1 every 24hours or more so as needed. This needs to be done by 8/12/22

### **Footnote 6**

**Notes:**

Dogs have access to water and are fed 2 times daily

### **Footnote 7**

**Notes:**

Doggie doors are closed shut and at this time dogs are not getting adequate exercise. Dogs have to be let out for exercise or have access to an outdoor run atleast twice a day. This needs to be fixed by 8/12/22

### **Footnote 8**

**Notes:**

Isolation is separate building behind main building if needed.

## Animal Welfare Inspection Form

### **Footnote 9**

**Notes:**

Disease prevention control plan is written on Vet agreement form

29 dogs were vaccinated and there are 31 dogs present. The 2 young ones on the end need varification of vaccination. This needs to be done by 8/12/22

Distemper and parvo records are not being recorded on each individual dog. Disptemper and Parvo records need to be kept on each individual dogs. Proof of records need to be updated by 8/12/22

### **Footnote 10**

**Notes:**

Vet Inspection is with Dr. McClintock as of 7/26/22

3. Ventilation, Temperature and Odor

*Notes Chapter 67.3(1)(d) Housing Facilities d. Indoor and outdoor housing facilities shall at all times be provided with ventilation by means of doors, windows, vents, air conditioning or direct flow of fresh air that is adequate to provide for the good health and comfort of the animals. Such ventilation shall be environmentally provided so as to maintain adequate temperature and minimize drafts, moisture condensation, odors or stagnant vapors of excreta. Auxiliary ventilation, such as fans, blowers or air conditioning, must be provided when the ambient temperature is above 85°F. Relative humidity must be maintained at a level that ensures the health and well-being of the animals housed in the housing facility. Indoor housing facilities must be capable of the following: (1) Maintaining humidity levels between 30 percent and 70 percent; and (2) Rapidly eliminating odors from within the building. [Odor is overwhelming today, with both vent fans running, fans running and windows and doors open.]*

## Animal Welfare Inspection Form

### **Footnote 1**

**Notes:**

Odor is overwhelming today, with both vent fans running, fans running and windows and doors open. Kennels and facility are not being kept up on for cleanliness resulting in the increase in odor. Once again dicussed with owner he has to keep up on sanitizing and cleaning to control odor.

### **Footnote 2**

**Notes:**

There is a significant amount of feces in cages and in troughs that catch feces and urine along with old stagnant water. Feces and urine have to be removed daily and troughs need to be cleaned and sanitized to prevent bacteria and for the dogs health.

### **Footnote 3**

**Notes:**

entrapment hazard along side of the kennel and at the top. Sturcture must be sound and in good repair to prevent injury, this must be fixed.

### **Footnote 4**

**Notes:**

pens and troughs have excess build up. Kennels and facility are supposed to be cleaned daily and more so as needed and sanitized every 2 weeks or more so as needed. This needs to be done to prevent bacteria and disease.

### **Footnote 5**

**Notes:**

There is a female that has mats and feces on the backs of her legs. The dogs are not being properly cared for. More personel would help keep up on things

### **Footnote 6**

**Notes:**

isolation facility is behind main facility

### **Footnote 7**

**Notes:**

pens and troughs have excess build up. Proof of vaccintation must be kept.

### **Footnote 8**

**Notes:**

owner has a vet inspection with Dr. McClintock as of 7-26-22

### **Footnote 1**

**Notes:**

Odor is strong today, vent fans were not running. Kennels and facility are not being kept up on for cleanliness resulting in the increase in odor. Once again dicussed with owner he has to keep up on sanitizing and cleaning to control odor.

### **Footnote 2**

**Notes:**

Kennels are cleaner, floors still have a build up of grime on them. Cleaning should be done once a day or more so as needed. This needs to be kept up on and improved, owner plans on selling all but 3 dogs. This needs to be improved by 10/27/22 or needs to let us know if all dogs are sold.

### **Footnote 3**

**Notes:**

Dogs have access to outdoor runs

### **Footnote 4**

**Notes:**

There is a seperate isolation facility that is compliant.

### **Footnote 5**

**Notes:**

Facility has a written disease prevention control plan.

All dogs are up to date on rabies and distemper/parvo.

### **Footnote 6**

**Notes:**

Vet inspection is with Dr. McClintock and is compliant
