Certificate: **88-A-0026**  
Site: 002  
Boris Petkov

Type: ROUTINE INSPECTION  
Date: 01-FEB-2023

---

### 2.134(a)

#### Contingency planning.

There was no written contingency plan available at time of this inspection. Failure to have a written contingency plan can result in lack of readiness for emergencies or disasters which could impact animal health and well-being. Facilities must develop, document, and follow an appropriate plan to provide for the humane handling, treatment, transportation, housing, and care of their animals in the event of an emergency or disaster.

Correct by 02/21/2023

### 3.1(a)

#### Housing facilities, general.

Outdoor enclosure housing dog, Tobias: A shelter door flap has broken off and exposed a square-shaped, metal hinge at the top of the entrance to the shelter structure. The hinge had four sharp pointed ends and was protruding into the shelter entry.

Outdoor enclosure housing dogs, Cleopatra and Wynona Judd: The frame material which surrounds the outer edges of the shelter entrance was in disrepair. The frame is loose and has left an approximately one-inch gap between the frame and the shelter entrance opening at the bottom.

## Inspection Report

---

Sharp or pointed metal edges within the enclosures could result in punctures or laceration wounds to the animals. Gaps or loose openings due the disrepair of shelter framing material may cause entrapment of the animals' legs or other injuries. Housing facilities for dogs must be in good repair, and they must protect the animals from injuries and contain the animals securely. A system of facility repair and maintenance must be in place to ensure the health and well-being of the animals.

Correct by 02/15/2023.

### 3.1(c)(2)

#### Housing facilities, general.

Enclosures for dogs, Dakota and Bentley, each had raised wooden platforms which have become excessively worn and chewed exposing raw wood. Surfaces which are excessively worn, chewed or contain unsealed, exposed wood may trap harmful organisms and cannot be properly cleaned and sanitized.

All surfaces must be maintained on a regular basis. Surfaces of housing facilities that cannot be readily cleaned and sanitized must be replaced when worn or soiled.

Correct by 02/15/2023.

This inspection and exit interview were conducted with a facility representative.
