Type: ROUTINE INSPECTION
Date: 04-DEC-2023

3.13(a)(4) Repeat

Veterinary care for dogs.

Female Buff and White Cocker Spaniel #44 has overgrown toenails and matting present on all four feet. The nails on all four feet are long and curl to the side when examined by the inspector. The hair on all four of the dog's feet is overgrown and has long pieces (1-2 inches in length) of matted strands of hair hanging from the underside of the feet. The facility representative states this dog's nails were trimmed and the dog was groomed at the beginning of November 2023, but the nails still have a lot of growth and matting is present. There is no record of this being completed. The representative stated they planned to do the trimming and grooming this week.

The program of veterinary care states that long haired dogs will be groomed once a month and clipped as necessary and toenails will be trimmed once a month. The licensee must follow their preventative care and treatment plans to ensure healthy and un-matted hair coats, properly trimmed nails, and clean and healthy eyes, ears, skin, and teeth and ensure it is effective at maintaining healthy husbandry for the dog. The licensee must have this dog's feet groomed to remove all matting and toenails clipped and ensure they follow their preventative care and treatment plan.

This inspection and exit interview were conducted with the licensee.
