Joseph Schmucker
387 River Rd
Clyde, NY 14433

Customer ID: **6014377**
Certificate: **21-A-0231**
Site: 001
Joseph Schmucker

Type: ROUTINE INSPECTION
Date: 03-OCT-2023

2.75(a)(1)

Records: Dealers and exhibitors.

The current records of animals on hand are inaccurate. The licensee has purchased eleven dogs from another facility, but has not listed that information on the required records of dogs on hand (form 7005). Additionally, five dogs have left the facility but were not listed on the required disposition records (7006). This needs to be addressed and records maintained in an accurate and timely manner.

3.11(a)

Cleaning, sanitization, housekeeping, and pest control.

Enclosures are not being spot cleaned daily to have fecal waste removed. Several of the enclosures with shavings down in the outdoor portion of the run have an accumulation of feces that needs to be removed. In addition, several of the gravel areas for the larger runs also have feces that needs to be removed on a daily basis. This needs to be addressed and fecal and food waste removed daily to reduce disease risks and potential contamination to the dogs.

3.11(c)

Cleaning, sanitization, housekeeping, and pest control.

Housekeeping at the facility needs to be addressed. There is a large black tub of shavings with a white grain bag left out next to the left side of the kennel. The right side of the kennel has an outdoor run that is currently used to store miscellaneous items such as old dog crates that are dirty, empty white grain bags, building materials, tables, and trash containers. This area creates a breeding and living environment for pests and must be cleaned to reduce this clutter. Lastly, there is discarded shavings and debris adjacent to the right side of the kennel that needs to be removed. This is also an attractant to pests and should be removed to promote good housekeeping practices.

Correct by: Oct 10, 2023

This inspection and exit interview were conducted with the licensee.
