3.13(a)(3)

Veterinary care for dogs.

The Program of Veterinary care (PVC) indicates adult dogs should be vaccinated once per year to protect against parvovirus and distemper, however the facility representative thinks it was longer than a year ago. Treatment records lacked any indication that the adults have been updated on parvo and distemper vaccines in the last year. Keeping adult dogs up to date on their vaccines is important to help prevent dogs from getting sick. Ensure to get the adult dogs updated on their parvovirus and distemper vaccines per the PVC and per the Attending Veterinarian's (AV) guidance (contact the AV and follow their guidance on when to vaccinate pregnant or lactating dogs).

***Correct by 1/8/2024.

This inspection and exit interview were conducted with a facility representative.
