3.6(a)(2)(x)

Primary enclosures.

Some of the weaned puppies and preweaning-aged puppies in eleven enclosures were observed to have feet or legs pass through the smooth-coated mesh floors when they walked. The facility reports mats with smaller mesh holes had been removed a little early for these groups for sanitation reasons. While the facility reports no injuries have occurred, floors have to be maintained so that dogs/puppies' feet cannot pass through the floor to prevent risk of injury. Ensure that processes are in place to keep enclosure floors in a manner that prevent feet/legs from passing through.

***Item was promptly corrected by the facility prior to the end of the inspection. Ensure corrective processes remain in place.

This inspection and exit interview were conducted with facility representatives.
