### 3.9(a)

#### Feeding

During inspection it was found that the food bin in the smaller kennel building had a buildup of crushed food on the back portion of the rim. The crushed food was blacked and smelled slightly moldy. Having molded food on the rim of the food bin risks contamination of the food and possible illness for the dogs. Food must be uncontaminated, wholesome, and palatable.

Correction date: February 23rd, 2024

This inspection and exit interview were conducted with a facility representative.
