Type: ROUTINE INSPECTION
Date: 25-JAN-2024

3.3(e)(1)(iii)

Sheltered housing facilities.

A building providing sheltered housing to 27 dogs has enclosure walls made of concrete blocks that are not sealed to make them impervious to moisture. For 18 dogs, including Rottweilers and Cavalier King Charles Spaniels, unsealed concrete block makes up the interior sidewalls and back wall of the enclosures. Enclosures housing 9 dogs, mostly Yorkshire Terriers, have a back wall that is unsealed concrete block. The licensee has purchased the sealer, but has not been able to apply it yet.

Enclosure walls made of materials that are porous (not impervious to moisture) can not be adequately cleaned and sanitized and could harbor viruses or bacteria that can cause illness in dogs.

All walls and other surfaces in contact with animals must be imperious to moisture.

To be corrected by: February 7, 2024

This inspection and exit interview were conducted with the licensee.
