Type: ROUTINE INSPECTION

Date: 30-APR-2024

---

#### 2.40(b)(3)

##### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

Charlie (#201), an adult male Irish Setter, had fur matting and a moist, black discharge in and around his left ear. The licensee stated that they had been out of town until the day prior and they had not noticed it since returning and their caretaker had not mentioned it. Discharge from the ear can indicate an ear infection and be painful. Daily observation of all animals must be done to assess their health and well-being so that health concerns can be communicated to the veterinarian in a timely manner. Correct by observing all animals daily, communicating any concerns to the veterinarian, and providing prompt treatment when warranted from 5/1//24 forward.

#### 3.13(a)(1)

##### Veterinary care for dogs.

The attending veterinarian has not visited the premises and performed a hands-on exam of every dog since 2/23/23. The program of vet care states that visits will occur annually and hands-on exams will occur at the annual visit. The licensee had records from visits from the last 2-3 years but admitted that the vet had not been out this year. Regularly scheduled visits to the premise and complete physical exams every 12 months are crucial to assessing the adequacy of vet care and animal health. Correct by scheduling a site visit by the attending veterinarian with hands-on exams of all adults dogs by 5/31/24.

This inspection and exit interview were conducted with the licensee.
