Type: ROUTINE INSPECTION
Date: 21-JUN-2024

3.1(c)(3)

Housing facilities, general.

Five shelters in the outdoor enclosures had a dark, wet, moldy bedding covering almost the entire floor of the shelter. The wet bedding was about an inch thick. There were 9 dogs in these enclosures. Mold, feces, dirt, and grime can harbor organisms that can affect the health of the dogs. The licensee must ensure that cleaning and sanitization are done as frequently as necessary to prevent excessive accumulation of feces, to prevent soiling of the dogs, and to reduce disease hazards.

Correction date: 25 June, 2024

This inspection and exit interview were conducted with a facility representative.
