**2.40(b)(2)**                      **Direct**                      **Repeat**

**Attending veterinarian and adequate veterinary care (dealers and exhibitors).**

During a focused inspection one dog, Philippe; a 12-year-old male Toy Poodle, (m/c# 0A01670943), was found to still be excessively matted all over. This included around his neck, down his back and around his legs. Matted hair can result in skin problems, can be painful, and can compromise the hair's ability to provide protection from the heat or cold. The licensee must remove the matted hair from Philippe and must establish an effective program of haircoat maintenance.

Dental disease is still present from inspection on April 3, 2024, however, licensee has discussed this with the attending veterinarian and a treatment plan has been put in place.

This inspection and exit interview were conducted with the licensee.
