3.11(a)

Cleaning, sanitization, housekeeping, and pest control.

Enclosures are not being spot cleaned daily. There was a build up of feces in multiple enclosures that needs to be removed. Fecal and food waste must be removed from primary enclosures daily to prevent soiling of the dogs and reduce odors.

3.11(c)

Cleaning, sanitization, housekeeping, and pest control.

Housekeeping at the facility must be addressed. There are empty whelping enclosures with fecal and food waste that have not been cleaned since the puppies left almost a month ago. Next to these whelping enclosures, there is a grate over the floor with one inch openings, and under the grate is visible fecal waste, old shavings, used syringe bottles and dust and debris. These areas of the kennel must be kept cleaned to reduce odors and disease hazards and to facilitate good housekeeping practices.
