Certificate: **31-B-0209**
Site: 001
HAPPY TAIL PETS LLC

Type: ROUTINE INSPECTION
Date: 05-JUN-2024

3.1(c)(1)(ii)

Housing facilities, general.

An enclosure is not being maintained in good repair. There is a tear in the paneling at the bottom left corner of a doggy-door on the exterior wall of a sheltered housing facility containing 6 adult dogs. The tear in the paneling is approximately 10-inches in length with sharp edges that are pulled away from the underlying wall. Sharp edges may cause injury to the dogs that come into contact with it. Correct by ensuring housing structures are free of jagged edges or sharp points by maintaining surfaces so that they can be repaired when worn or damaged. Correct by: June 15, 2024.

3.13(b)(4)

Veterinary care for dogs.

The facility is not keeping a current medical record of heartworm testing dates and results. The last record is from 11/16/22. The Attending Veterinarian (AV) reports that the heartworm tests were done when blood draws were performed for other testing within the last year. Maintaining medical records allows APHIS officials the ability to verify that the facility is following their Program of Vet Care, as well as ensuring the dogs at the facility are receiving adequate veterinary care. Correct by ensuring the facility keep copies of medical records and make the records available during APHIS inspections. These records must include the dates and findings/results of all screening, routine, or other recommended or required test or examination. Correct by: June 6, 2024, onward.

This inspection and exit interview were conducted with the facility representative.
