Type: ROUTINE INSPECTION  
Date: 13-MAY-2024

---

#### 2.50(a)

##### Time and method of identification.

Dogs do not have their official identification tags. The facility has assigned identification numbers to each dog in the records but must obtain tags for each dog as required. Official identification for each dog is required and can be important for husbandry and health tracking. If tags are the chosen means for identification, ensure to obtain and affix identification to each dog by means of a collar made of material generally considered acceptable to pet owners as a means of identifying their pet dogs.

\*\*\*Correct by June 30, 2024.

#### 3.1(c)(3)

##### Housing facilities, general.

Hard surfaces in the outdoor runs had areas that aren't getting spot cleaned daily. While dogs had clean areas in each enclosure to walk around the excreta, daily spot cleaning of all hard surfaces is required to help reduce disease hazards and build-up of excreta. Ensure to maintain a routine of daily spot cleaning hard surfaces and also clean and sanitize hard surfaces at least once every 2 weeks or more often to protect the health of the animals.

\*\*\*Correct by 5/14/2024 forward.

This inspection and exit interview were conducted with the licensee.
