Type: ROUTINE INSPECTION  
Date: 24-SEP-2024

---

**2.40(b)(2) Direct**

**Attending veterinarian and adequate veterinary care (dealers and exhibitors).**

A female, mixed breed dog identified with USDA tag #20 was observed to have a large amount of dried and thick, sticky discharge on and around both eyes. The licensee stated that the dog's eyes have been this way for approximately six weeks and that he has been treating them with a spray used for pink eye. The medication is not listed as a treatment for eyes in the Program of Veterinary Care and the Attending Veterinarian (AV) has not evaluated the dog's eyes. Large amounts of discharge in and around the eyes is abnormal and can be a symptom of serious and painful health conditions. Using an unapproved medication in the eyes, without the guidance of the AV, may do nothing to correct the underlying condition and may worsen the problem. The dog's eyes must be evaluated by the AV and the prescribed treatment must be followed. Correct by September 26, 2024.

This inspection and exit interview were conducted with the licensee.
