Certificate: **33-A-0580**
Site: 001
NELSON HOCHSTETLER

Type: ROUTINE INSPECTION
Date: 23-JUL-2024

3.6(c)(4)

Primary enclosures.

An approximately 1.5 year old male Dalmation (microchip ID 991003002177467) was tethered in its kennel. Tethering a dog for an extended period of time can be uncomfortable and stressful for that dog. In addition, it can result in injury to the dog. Tethering of dogs for use as a primary enclosure must be discontinued. Correct starting on 7/23/24.

3.10(a)

Watering

An approximately 1.5 year old male Dalmation (microchip #991003002177467) was tethered in its kennel. The tethering prevented the dog from reaching the watering nipple. Not having water continuously available may negatively affect the health and well being of the dog. The dog must be provided potable water on a continual basis. Correct starting on 7/23/24.

This inspection and exit interview were conducted with the licensee.

End of report.

Additional Inspectors:

Bryan Voetberg, VETERINARY MEDICAL OFFICER

Leann Sargeant, VETERINARY MEDICAL OFFICER
