SOS Exotic Cats

Type: ROUTINE INSPECTION  
Date: 11-SEP-2024

---

#### 3.125(a)

##### Facilities, general.

An enclosure housing a serval had an outdoor gate where one of the posts at the bottom was rusted through. It had jagged edges. Jagged edges can cause injury to the animal. The rusted out section could create a large enough hole where the serval could potentially escape from its enclosure. In addition the rusted area doesn't allow for it to be properly cleaned and/or sanitized. The rusted area of the fence must be repaired so there are no longer any jagged edges or holes in the fencing. Correct by 10/11/24.

This inspection and exit interview were conducted with the licensee.

End of report.
