### 3.1(c)(2)

#### Housing facilities, general.

\* One fiberglass wallboard has an estimated four-inch circular area of missing fiberglass. Three dogs are in contact with the affected wall board which is located in sheltered housing. Surfaces not maintained on a regular basis cannot be readily cleaned and sanitized. The open area between the fiberglass and wood wall could serve as a collection area for dirt, hair, fecal waste or other debris. The licensee must ensure that all surfaces must be maintained on a regular basis, can be readily cleaned and sanitized or be replaced when worn. Correct by 4/17/23.

This inspection and exit interview were conducted with the licensee.
