#### 3.13(a)(3)

##### Veterinary care for dogs.

\* No recorded date for fecal float testing for 33 dogs had been completed at time of inspection. Annual fecal float testing is important for the health of the animals. Fecal float testing is done to ensure that there are no active internal parasites. The licensee must ensure that all dogs are receiving vaccinations for contagious and/or deadly diseases of dogs (including rabies, parvovirus, and distemper) and sampling and treatment of parasites and other pests (including fleas, worms, coccidia, giardia, and heartworm) in accordance with a schedule approved by the attending veterinarian. Correct by 5/6/23.

This inspection and exit interview were conducted with the licensee.
