Type: ROUTINE INSPECTION
Date: 06-JUL-2023

2.40(b)(2) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

An adult female French Bulldog (Microchip #642099000659719) has inflamed ears with discharge present. Both ears are noticeably reddened and contain large amount amounts of dark discharge. The ear canal cannot be seen or accessed due to the severe inflammation. The appearance of the ears is consistent with a chronic condition that has been occurring for an extended period of time. The licensee states they were not treating the condition.

Inflamed ears with discharge can be a sign of infection and can cause pain and discomfort for the animal. Failure to treat problems of animal health can lead to delays in providing proper care to animals resulting in worsening of their condition. Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend and holiday care. Ensure that problems with animal health, behavior, and well-being are identified and conveyed to the attending veterinarian in a timely manner. Correct by contacting a veterinarian for assessment and following their treatment plan. Correct by 7-JULY-2023.

3.1(c)(2)

Housing facilities, general.

Excessive damage from scratching is present on the surface of a primary enclosure housing two adult dogs. The damage was seen on one side of the enclosure along with brown material and was covering a large portion of the wall. Damage from scratching on walls cannot be properly sanitized and can creates sharp points that can cause injury to the animals. All surfaces must be maintained on a regular basis. Surfaces of housing facilities-including houses, dens, and other furniture type fixtures and objects within the facility- that cannot be readily cleaned and sanitized, must be replaced when worn or soiled. Correct by ensuring that all surfaces are maintained or replaced when worn or soiled. Correct by 6-AUGUST-2023.

3.1(c)(3)

Housing facilities, general.

Enclosures are not being cleaned properly. Two primary enclosures that house 2 dogs each has walls that soiled with a buildup of brown material. Inadequate and infrequent cleaning and sanitization allows for the growth of disease-causing agents that may increase the risk of health hazards towards the animals. Appropriate cleaning and sanitization of the

Inspection Report

surfaces must include removal of the buildup of brown material found and to prevent accumulation of this material. All surfaces of housing facilities must be cleaned and sanitized when necessary to satisfy generally accepted husbandry standards and practices. Correct by ensuring hard surfaces with which the dogs come into contact with are spot cleaned daily and sanitized in accordance with 3.11 (B) of this sub part to prevent accumulation of excreta and reduce disease hazards. Correct by 13-JULY-2023.

3.11(d)

Cleaning, sanitization, housekeeping, and pest control.

Excessive amounts of flying insects were noted throughout the facility. The insects were found on the inside of the facility and also on the outside runs. Two fly strips were placed inside and are completely filled with insects. Insects can spread disease, contaminate food and water, and cause discomfort and distress to the animals. An effective program for the control of insects and external parasites affecting dogs must be established and maintained so as to promote the health and well-being of the animals and reduce contamination by pests in animal areas. The licensee must establish an effective plan for the control of the insects. Correct by 13-JULY-2023.

3.13(b)(3)

Veterinary care for dogs.

The licensee does not maintain complete medical records for adult dogs. The licensee documents dates when the dogs are dewormed but does not provide any additional information including the name of the dewormer or the amount given. Failure to maintain adequate medical records may interfere with the ability of APHIS officials to determine if the animals are receiving adequate veterinary care. Complete medical records must be maintained and include the names of all vaccines and treatments administered and the dates of administration. Correct by documenting all treatments given and ensure that medical records are complete and contain the required information. Correct by 7-JULY-2023.

This inspection and exit interview were conducted with the licensee.
