HEATH MEYERS

Type: ROUTINE INSPECTION
Date: 25-JUL-2024

2.75(a)(1) Repeat

Records: Dealers and exhibitors.

Seventeen dogs over 4 months of age have not been added to the facility's Record of Dogs on Hand (APHIS form 7005). They are still being inventoried by their puppy cage cards. Cage cards are an acceptable form of inventory for dogs under 4 months of age. Accurate acquisition information is necessary for APHIS officials to make positive identification of animals during inspection and to properly trace their movements. The licensee shall make, keep, and maintain an approved method of documentation which fully and correctly disclose all information concerning each dog purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that dealer. The records shall include any offspring born of any animal while in his or her possession or under his or her control. The licensee must record the acquisition information on an approved document (APHIS form 7005) for all dogs and ensure all required acquisition information is properly and accurately documented at all times.

3.13(b)(1) Repeat

Veterinary care for dogs.

The licensee is missing the annual distemper and parvovirus vaccine dates as well as their deworming (ivermec) dates for female Bichon "Randi". The licensee states vaccines and deworming are done when being groomed 2-3 times per year. When this dog was groomed on January 15, 2024, the vaccine and deworming date weren't updated as done. The last recorded date for distemper and parvovirus vaccines and ivermec deworming was March 2, 2023. The lack of medical records makes it difficult to determine if the animals are receiving vaccinations and deworming. This information is needed for APHIS inspectors to ensure the medical care is being provided by the facility.

The licensee must maintain complete and maintain updated medical records including the identity of the animal, including identifying marks, tattoos, or tags on the animal and the animal's breed, sex, and age; Provided, however, that routine husbandry, such as vaccinations, preventive medical procedures, or treatments, performed on all animals in a group (or herd), may be kept on a single record.

This inspection and exit interview were conducted with facility representatives and the licensee.
