Customer ID: **5625**
Certificate: **42-A-1672**
Site: 001
HEATH MEYERS

Type: RE-LICENSE INSPECTION
Date: 26-SEP-2024

3.1(c)(1)(i)

Housing facilities, general.

Twenty primary enclosure handles have worn away the black coating exposing excessive flaking rust. Surfaces that contain rust cannot be adequately cleaned and sanitized and may create a disease hazard risk to the animals. Interior metal surfaces and those that come into contact with the dogs must be free of rust that prevents the required cleaning and sanitization.

This was corrected during the inspection.

3.7(c)

Compatible grouping.

There was a group of dogs housed together that included 2 puppies under 4 months of age and one young adult dog over 4 months old that was not their dam or foster dam. Housing puppies with adult dogs that are not their dam or foster dam may result in injuries due to compatibility problems. Puppies under 4 months of age or less may not be housed in the same primary enclosure with adult dogs other than their dams or foster dams.

This was corrected at the time of inspection.

This is a 1st Re-License Inspection for a Class "A" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by 25-November-2024 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
