### 3.1(c)(1)(ii)

#### Housing facilities, general.

In the area for the large breed dogs, a piece of wall metal has come loose from the structure so some nail/screw points are exposed that the dogs could possibly contact. Also, in the sheltered building a divider panel has been pushed away from a floor brace exposing the metal corners that the adult toy breed dogs could contact. These exposed sharp points could injure the dogs. Ensure that areas of sharp points are maintained to prevent any injury to the dogs.

Correct by 3/16/2022.

This inspection and exit interview were conducted with a facility representative.
