

Inspection Report

Marvin Yoder
5635 County Road 19
Millersburg, OH 44654

Customer ID: **330211**
Certificate: **31-A-0577**
Site: 001
MARVIN YODER

Type: ROUTINE INSPECTION
Date: 15-MAY-2023

3.9(b)

Feeding

There was an excessive accumulation of a brown film of organic matter dusted with white powder coating the inside walls of a plastic storage tub used for dog food storage. It is not known when this tub was last cleaned and sanitized. Residues accumulating in food storage receptacles may be a source of spoiling, contamination, or spread of disease from food fed to the regulated animals. The licensee must ensure that food receptacles be cleaned as often as needed to prevent accumulation of debris, food waste, etc. Correct by: May 22, 2023.

3.11(a)

Cleaning, sanitization, housekeeping, and pest control.

All of the enclosures in the indoor housing facility have an excessive accumulation of hair wrapped around wires of the paneling. This organic debris hangs approximately 2" from the bottom of the wires. Accumulation of organic debris can harbor disease agents which the regulated animals may come into contact with. It can also be a fire hazard, attract insects, and/or emit odors. The licensee must clean the primary enclosures as often as necessary to prevent the accumulation of hair and other debris in order to reduce diseases, hazards, insects, and odors. Correct by: May 22, 2023.

This inspection and exit interview were conducted with the licensee.
