MILLERS COUNTRY PUPPIES

Type: ROUTINE INSPECTION

Date: 07-FEB-2024

3.6(a)(1)

Primary enclosures.

One wire mesh puppy enclosure had a small section of wire mesh floor that is not connected to the side wire creating a gap in the floor. This needs to be addressed to keep the enclosure in good repair for the safety of the puppies.

Correct by: Feb 14, 2024

3.11(a)

Cleaning, sanitization, housekeeping, and pest control.

The inside enclosure runs are not being spot cleaned daily. The facility has been using sawdust on in the inside enclosure floors and is removing the feces and sawdust every three days. Fecal waste must be removed from primary enclosures daily to prevent soiling of the dogs and for their welfare.

Correct by: Feb 8, 2024

3.11(c)

Cleaning, sanitization, housekeeping, and pest control.

Housekeeping for the facility needs to be addressed. There are tools and other miscellaneous items (magic eraser sponge) being stored directly on top of wire mesh puppy enclosures. One puppy was playing with the sponge which could cause harm if potentially ingested. The table along the wall had food items and dental chews stored next to various husbandry supplies and general clutter. This clutter and various supplies can promote an area for pests to thrive and needs to be cleaned. Areas in the kennel must be kept clean to facilitate and promote hood housekeeping practices.

Correct by: Feb 8, 2024

This inspection and exit interview were conducted with the licensee.
