### 2.132(d)

#### Procurement of dogs, cats, and other animals; dealers.

During the 2021 calendar year, the facility purchased more than \$500.00 dollars worth of rabbits from an unlicensed source who was required to be licensed. Licensure under the Animal Welfare Act (AWA) is important for animal welfare and well-being, because license holders are subject to oversight and inspections to ensure compliance with AWA regulations and standards. Ensure animals are purchased from licensed sources when required.

### 3.13(a)(3)

#### Veterinary care for dogs.

The facility's documented program of veterinary care for dogs (PVC) doesn't address vaccinations against rabies and frequency of rabies vaccination. Additionally, the PVC doesn't address testing/treatment frequencies for blood parasites such as heartworm. Vaccination against rabies and testing/treatment for blood parasites are an important part of the PVC as they provide immunity and protection for the puppies. Ensure provisions for rabies vaccination and frequency of vaccinations, and testing/treatment for blood parasites are addressed in the PVC.

This is a 1st Re-License Inspection for a Class "B" license. The inspection and exit briefing were conducted with the applicant.
