ESTHER & WILLARD
BORNTRAGER

Type: ROUTINE INSPECTION

Date: 04-MAR-2024

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A female Cocker Spaniel, tag #156, was observed with a heavy accumulation of plaque and tartar on both the upper and lower teeth. The gums above some of the upper teeth were reddened and inflamed.

A female Poodle, tag #143, was observed with a heavy accumulation of plaque and tartar on both the upper and lower teeth. The gums are reddened and inflamed. This dog also has issues with both ears. The ear canals are reddened and inflamed with a dark brown discharge from both ears.

These conditions can be painful, lead to other systemic health related issues and be a sign of a medical condition that requires veterinary care.

The licensee must have these dogs evaluated by a veterinarian.

The licensee must establish and maintain an adequate program of veterinary care that includes the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries at all times.

To be corrected by: 8 Mar 24

2.50(a)(1)

Time and method of identification.

There were at least 2 dogs that did not have any form of identification. Proper identification is necessary so the dog identity is known for certain. The licensee must provide these dogs with a form of identification and ensure that all adult dogs have an official form of identification at all times.

To be corrected by: 11 Mar 24

This inspection and exit interview were conducted with licensee.
