Type: ROUTINE INSPECTION
Date: 09-DEC-2024

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There is a bottle of expired anti-parasitic medication (ivermectin) being used for the dogs in the kennel. The bottle has an expiration date stamp of APR 2024. Medical records indicate this medication was still being used May-November 2024 for heartworm prevention in adult dogs at the facility. Medications being used past the expiration date have unknown efficacy and potency; thus, they may no longer be efficacious for the labeled indications of use. Correct by ensuring that the facility is using the appropriate methods to prevent and control diseases. Correct by: December 25, 2024, onward.

2.78(a)

Health certification and identification.

The facility is not obtaining health certificates on puppies prior to shipment with an intermediate handler. Three puppies were sold in 2024 and transported by an intermediate handler and did not have a corresponding health certificate. Health certificates are important in assuring the puppies being transported are free from communicable and contagious diseases prior to shipment. Correct by ensuring the facility shall only deliver a dog (or puppy) to an intermediate handler for transportation in commerce unless it is accompanied by a health certificate executed and issued by a licensed veterinarian. Correct by: December 20, 2024, onward.

3.13(a)(3)

Veterinary care for dogs.

The facility is not following the Program of Vet Care (PVC) for vaccinations. Of the 68 adult dogs, 66 are not up to date on the three vaccinations required by the Animal Welfare Act (rabies, distemper, and parvovirus). The current Program of Vet Care prescribes for the vaccinations to be performed yearly, after completing their puppy series (which ends at 14 weeks of age).

- The following dog has no history of receiving the rabies vaccine (the distemper/parvovirus vaccine is current):
Female Yorkie "Makenna" #2737

- The following dog has a history of all three vaccines but are now overdue:
Male Poodle #3096

Inspection Report

- Female Cavapoo "Linsey" #2348
- Female Havanese "Samantha" #5731
- Female Havanese "Tina" #5739
- Female Havanese "Tara" #5738
- Male Yorkie "Leo" DOB 7/23/21
- Male Yorkie "Denver" #0263
- Female Yorkie "Pebbles" #8090
- Female Yorkie "Peggy" #7495
- Female Yorkie "Suzi" #4959
- Female Yorkie "Miley" #6092
- Female Yorkiepoo "Winnie" #2329

- The following dogs did not complete their puppy series of distemper/parvovirus vaccinations:

- Female Pug "Dana" #3711
- Female Pug "Demi" #3701
- Female Yorkie "Shelly" #4232
- Female Yorkie "DM Peggy Sabrina" #4601
- Female Yorkie "DM Peggy Sophia" #4618
- Female Yorkie "DM Pebbles Chloe" #4614
- Female Pug "Brooklyn" DOB 7/13/23
- Female Pug "Phoenix" #6521
- Female Pug "Paris" #6500
- Female Pug "Penny" 6526
- Female Schnauzer DOB 6/20/23
- Female Schnauzer "Libby" #0746
- Female Cavalier "Candy" #0240
- Female Cavalier "Honey" #0246

Failure to follow the PVC for vaccination leaves the dogs susceptible to diseases, which, if contracted, would cause pain, distress, and suffering. It is also important for breeding dogs to be vaccinated because they will pass immunity from vaccines onto their offspring. Correct by administering all of the vaccines required by the Animal Welfare Act (distemper, parvovirus, and rabies) in accordance with a schedule approved by the Attending Veterinarian and vaccine manufacturer recommendations. Correct By: January 5, 2025, onward.

This inspection and exit interview were conducted with the facility representative.
