

Inspection Report

Edna Troyer Elmer Troyer
10038 Hwy Y
CLARK, MO 65243

Customer ID: **332162**
Certificate: **43-A-5917**
Site: 001
ELMER TROYER, EDNA TROYER

Type: ROUTINE INSPECTION
Date: 18-MAY-2022

3.11(d)

Cleaning, sanitization, housekeeping, and pest control.

There was an excessive amount of flies inside and outside of the facility. The flies on the outside of the building were covering the PVC pipe used on top of enclosure dividers and were regular sized flies. The flies inside the building were small flies, they were on the walls and washdowns with about 40 flies per sqft.. The flies were also around the food, feces, and damp areas. There was a fly reel strip along the ceiling inside the kennel that was rolled to expose new tape during the inspection. Pests, such as flies, increase the risk of disease hazards. The licensee must develop a program of safe and effective pest control to reduce or eliminate the population of flies.

This inspection and exit interview were conducted with the licensee.
