3.11(a)

Cleaning, sanitization, housekeeping, and pest control.

There is an excessive accumulation of feces, hair and waste at the ends of the outdoor runs housing the adult dogs. Some of the fecal matter is white, dry, and crumbly indicating that it has been present for longer than a day. Waste is a potential source of contamination to the enclosed animals. Excreta and food waste must be removed from primary enclosures at least on a daily basis.
