3.6(b)(4)

Primary enclosures.

There are two young adult male cats housed in a primary enclosure without suitable resting surfaces. Lack of elevated resting surfaces can negatively impact the well-being of the animals, as such surfaces allow the animals to exhibit natural behaviors and decrease stress. The licensee must ensure that each primary enclosure housing cats contains a resting surface or surfaces that, in the aggregate, are large enough to hold all the occupants of the primary enclosure at the same time comfortably. The resting surfaces must be elevated, impervious to moisture, and be able to be easily cleaned and sanitized, or easily replaced when soiled or worn.

This is a 1st Re-License Inspection for a Class "B" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections by 02/14/2024 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
